

## **Bio 241 A&P 1**

### **Learning Anatomical Bone Features Worksheet:**

The study guide, Lab handouts 1 through 3, and your textbook are the resources you will need to complete this worksheet.

1. Define the term Head as it refers to bones.
  - a. What bones have a head?
2. Define the term Neck as it refers to bones.
  - a. What bone have a neck?
3. Define the term Body as it refers to bones.
  - a. What bones, have a body?
4. Define the term Angle as it refers to bones.
  - a. List bones and their specific angles you need to know.
5. Define the term Ramus as it refers to bones.
  - a. List bones and their specific ramus you need to know.
6. Define the term Margin as it refers to bones.
  - a. List bones and their specific Margins you need to know.
7. Define the term Condyle as it refers to bones.
  - a. List bones and their specific condyles you need to know.
8. Define the term Epicondyle as it refers to bones.
  - a. List bones and their specific epicondyles you need to know.
9. Define the term Linea or line as it refers to bones.
  - a. List bones and their specific linea or lines you need to know.
- 10 Define the term Crest or crista as it refers to bones.
  - a. List bones and their specific crest or crista you need to know.
11. Define the term Spine as it refers to bones.
  - a. List bones and their specific spines you need to know.
12. Define the term Tubercle as it refers to bones.
  - a. List bones and their specific tubercles you need to know.

13. Define the term Tuberosity as it refers to bones.
  - a. List bones and their specific Tuberosities you need to know.
14. Define the term Trochanter as it refers to bones.
  - a. List bones and their specific trochanters you need to know
15. Define the term Hamulus as it refers to bones.
  - a. List the only bone with hamulus form your labs.
16. Define the term Foramen as it refers to bones.
  - a. List bones and their specific foramen you need to know.
17. Define the term Meatus as it refers to bones.
  - a. List bones and their specific meatus you need to know.
18. Define the term Fissure as it refers to bones.
  - a. List bones and their specific fissure you need to know.
19. Define the term Sinus as it refers to bones.
  - a. List bones and their specific sinus you need to know.
20. Define the term Fossa as it refers to bones.
  - a. List bones and their specific Fossa you need to know
21. Define the term Notch as it refers to bones.
  - a. List bones and their specific notch you need to know
22. Define the term Sulcus as it refers to bones.
  - a. List bones and their specific sulcus or sulci you need to know.
23. What are wormian or sutural bones?
  - a. Where would you find them?
24. What bones make up the “axial” skeleton?
25. What bones make up the “appendicular” skeleton?
26. List and describe the functions of the skeleton system.
