

Muscles of the pelvic floor and perinium:

Levator ani Coccygeus	Action is the same as Coccygeus. See below. Tenses and supports pelvic floor. Resists intra-abdominal pressure during forced expiration, coughing, vomiting, urination and defecation.
Bulbospongiosus (Bulbocavernosus)	Helps expel urine; propels semen; assists erection of penis; constricts vaginal orifice and assists in erection of clitoris.
Ischiocavernosus	Maintains erection of penis and clitoris.
External anal sphincter	Closes anal opening
